The world's maps in your pocket Need a ride? The world in the palm of your hand Google's virtual copilot for Android The best social GPS tool Find the cheapest, most efficient form of transport in South-East Asia Book a hotel in any city worldwide Find the best local spots In May 2019, Craig Moore reports from Delhi/Noida: The Noida Metro is a 28.1 revenue Km elevated single line operating in the Noida area of eastern Delhi NCR. The line has 21 stations and runs from Noida Sector 51 (where there is a 350m gap to Delhi Metro Blue Line Sector 52 station – free branded auto-rickshaw transfer available, but new Metro ticket purchase required) above main corridors in a south easterly direction as far as Sector 148. From there, a sharp left turn sends the route in a north easterly direction toward Depot terminus. The line has a different ownership and brand to the Delhi Metro and there is a different feel. The stations are quite large and overbuilt, with entrance from the street involving stairs/escalators to the first floor ticket hall level. These are dark but cool spaces with security teams, system information boards and ticket offices dispensing paper tickets (with QR code) for the journey. Tickets cost 10-50 Rupees depending on distance, but there are reduced fare levels for Sundays and Public Holidays (approx. 20% reduction). Tickets are scanned on a glass pane on the ticket barrier and gates open to provide access to the paid area where access to the side platforms above is provided by stairs and escalators. The platforms are high, bright and have half screens with inoperable gates. The platforms are built for six car trains but four car sets are used and the ends of platforms have full glass barriers without gates (trains stop in the middle of the platform). There is basic RTI and line strip maps. The roof is of grey corrugation, supported by similarly toned angled girders. In addition, the stations have solar paneling on many surfaces which supports part of the running of the system. Although the stations are over large constructions they are clean, fresh and smart and have interesting art works and images across the system, which differentiate stations. Trains run from 0600-2200 with 10min base headways and use overhead supply and standard gauge track. The trains were built by CRRC and run in four cars sets. The exterior is metallic with aqua band along the top, which swoops across the front of the train, this being predominantly black, and includes the red and green logo and destination board. The doors sit proud along the side of the train. The interior is white with aqua seating and grab handles, as well as darker seating for ladies and elderly (there are no female only coaches). The strip map is in sticker form but there is also dynamic information screens along the side and at the end of carriages. All information is offered in Hindi and English, as is audio provision. The ride is really smooth and there are some good cambers along the route making things quiet also. The system is not particularly well patronised at the moment and trains are very quiet compared to some of the Delhi lines. Using the system is easy - directional signage is fine and there are well located line maps across the stations. There is no hard copy information available but staff are helpful if there are queries. As there is no direct physical transfer to the Delhi Metro, new tickets are required (as was previously the case with the Rapid Metro in Gurugram-here Delhi Metro tickets now function). Staff told me that the NMRC Noida Metro is an autonomous system and different tickets will always apply. Yet this line is jointly operated by NMRC and DMRC and is branded as the Aqua Line, and is part of the Delhi Metro map – perhaps there will be greater functional integration in the future. In summary, this line has a different feel to the Delhi Metro in some ways and is a smart addition to the rapid transit coverage in the Delhi NCR. Download Latest Version‹12.1MB› You can download the Delhi Metro Map PDF for free using the direct download link given at the bottom of this article. File nameDelhi Metro Map PDF No. of Pages2File size3.4 MBDate AddedAug 17, 2022CategoryGeneralLanguageEnglishSource/CreditsDrive Files Delhi Metro Map Overview The Delhi Metro is a mass rapid transit system on National Capital Region [NCR] of India. The Delhi Metro is well connected with all the satellite cities of Delhi, which is Noida, Gurgaon, Ballabhgarh, Bahadurgarh, Ghaziabad and Faridabad. Currently Delhi Metro is busiest metro in india and older metro in India after Kolkata Metro. The network consists of 10 colour-coded lines serving 253 stations with a total length of 389 kilometers (242 mi), 285 stations, including the Gurugram Metro and Noida Metro. Benefits of Delhi Metro: reduction in air pollution,time saving to passengers,reduction in accidents,reduction in traffic congestion,fuel savings. 10 colour coded lines: The Red Line (1) was the first line of the Metro to be opened and connects Rithala in the west to Shaheed Sthal (New Bus Adda) in the east, covering a distance of 34.55 kilometres (21.47 mi).The Yellow Line (2) was the second line of the Metro and was the first underground line to be opened on the Delhi Metro. It runs for 49 kilometres (30 mi) from north to south and connects Samaypur Badli with HUDA City Centre in Gurgaon.The Blue Line (3 & 4) was the third line of the Metro to be opened and the first to connect areas outside Delhi. Mainly elevated and partly underground, it connects Dwarka Sub City in the west with the satellite city of Noida in the east, covering a distance of 56.61 kilometres (35.18 mi).Green Line (5) is the fifth line of the Delhi Metro network and the first line on standard gauge, as opposed to previous broad-gauge lines. The line consists of 24 stations including an interchange station covering a total length of 29.64 km (18.42 mi).The Violet Line(6) is the sixth line of the Metro to be opened, and the second standard-gauge corridor after the Green Line. The 47-kilometre-long (29 mi) line connects Raja Nahar Singh in Ballabgarh via Faridabad to Kashmere Gate in New DelhiThe Airport Express line runs for 22.7 km (14.1 mi) from New Delhi Railway Station to Dwarka Sector 21, linking the Indira Gandhi International Airport.The Pink Line(7) is the second new line of the third phase of the Delhi Metro. It was partially opened on 14 March 2018, with a further extension opening on 6 August 2018. On 31 October 2018, Trilokpuri Sanjay Lake to Shiv Vihar section was opened.The Magenta Line(8) is the first new line of the Third Phase of the Delhi Metro that was partially opened on 25 December 2017 between Botanical Garden and Kalkaji Mandir.The Grey Line (9) is the shortest route in the system. It connects Dwarka to Dhansa Bus Stand in the western part of Delhi. It covers around 4.295 km and comprises four stations: Dhansa Bus Stand, Najafgarh, Nangli and Dwarka. Delhi Metro Map PDF Download Link Prices are subject to change without notice, so customers should always check AFD CSD Online Portal for updates before making their purchase - afd.csdindia.gov.in login page Delhi Metro is a part of daily life for millions of travellers of Delhi. And we know how difficult it would have been to travel if there was no Delhi Metro, but Delhi Metro has done this task very well if we are traveling in Delhi Metro. Delhi Metro Route Map is a very good tool by which you can easily analyse your starting and destination easily, DMRC's Delhi Metro Map displays all the routes. It tells you where to start your journey. And from which station, change the metro so that you can easily reach your destination. At one time it seemed like how to travel in such a crowded area of ?? Delhi, it was very difficult to move from one place to another, but the tireless efforts of the Delhi government Due to 2002 Delhi metro got a better option, but this option was also quite difficult which we needed to make travellers happy and enjoyable Due to the relentless efforts of the Delhi Government, a network of Metro maps of Delhi was made to make it easier to move from one place to another in whole Delhi, it was very difficult to run the metro together in whole Delhi, so the Delhi Metro phases was built. Delhi Metro Map are amazing guides to reduce your computation, which can easily rotate around and inside the city. As We can say that it provide us Complete Route Details of Metro Map Delhi and Updated Delhi metro Timing.
